Dear Yoko,

I am Chuan sheng Liu .Linliu is my friend who I recruited to GA in early 1980s when I was director for Theory,appointed by Tihiro.

I am so glad to get your message to know Tihiro passed away Peacefully and his ashes in the Pacific Ocean .I do hope to see You next time I visit San Diego.I remember fondly your Parties in your home in 1980s and your gracious hospitality and cheerfulness.

I am most grateful to Tihiro as he gave me the opportunity to work with him at GA both at its lowest point, 1970,before Doublet was funded and at its height in 1980-85.

He not only introduced me to fusion but also provided me the best

role model as a scientist. His habit for creativity is a story I often told students. I was talking about his habit of having new ideas everyday on September 21, in Peking university to students on the subject of fusion.

Together with me were Prof. He and former President Chen from China and Prof. Mima from Japan.

We fusion physicists work for science and peace so this new energy will be used for benefit of mankind. Tihiro has set the best example for us to emulate.

Best wishes

Chuan Sheng Liu

Master, University of Macau

Professor Emeritus, University of Maryland

Dear Lin liu (Did I spell right)

Last time you were here, Sumi tried to get hold of me and I missed seeing you.

I thank you so much for your mail.

2 days ago, we finally buried his ashes into the Pacific Ocean.

He died of a natural cause in peace. He lived all his life in the way he wanted.

I thank you very much for being so good to him while he was working and your nice mail this time.

Please get in touch with me, next time you are here. I love your sense of humor.

Sincerely, Yoko

Dear Yoko, I am very saddened by the news of the passing of Tihiro. The day of his passing away I was talking about him ,particularly his great creativity and what I have learned from him In Beijing to faculty and students of Peking university and several fusion leaders of the world community such as Prof.Mima Sent from my iPhone
