**Subject:** Tahiro

Dear Yoko, we were much saddened to learn about Tahiro through Steve Dean. We well remember meeting you and Tahiro at Oxford those many years ago; and my knowing Tahiro when I was a student and he first came to this country to work with Don Kerst on accelerators in Michigan; and our few years together at GA and then Archimedes; and of course our wonderful trip with you to China when Tahiro taught the Chinese physicists how to make their tokamak work overnight, to everyone's astonishment -- but that is how good he was; and that I would never give him the chance to beat me at tennis as I would not play bridge with Marshall. Much love, to you and your family,

Ken and Carol Fowler
