**Subject:** Tihiro's passing

Dear Yoko,

I was greatly saddened to hear about the sudden passing away of Tihiro.

I have known him for decades and would see him occasionally while I come to visit at GA .

He made tremendous contributions to magnetic fusion research, was one of the true pioneers, and DIII-D being his creation,

is still is one of the best and arguably the most productive magnetic fusion device in the world.

Please keep me posted if there will be any memorial service later on his behalf, I will try to attend,

and meanwhile would be glad to send contributions to his favorite charity or cause.

With warmest wishes at this time of mourning and remembrance,

Miklos
