Subject: sending condolence

Dear Yoko,

Take our condolence from distant Ukraine. There are several members of our Center who knew Tihiro personally. I was lucky to meet him several times, including the visit to your home in LaJolla in 1984. I remember that gave you not right recipe as for cooking "pirozhki".

I have some slides of that time and shall try to find them and send you after they will be digitized.

He was a nice person and a great inventor. The installation in San Diego still has the name which Tihiro invented for the first version of this machine: Doublet III-D.

Restrain yourself.

Best wishes,

Vladimir Voitsenya
